Presentation

The course in Psychology of Justice: Victims of crime follows the bachelor's in psychology. The main objective is training students on advanced skills of observation, evaluation and psychological intervention in the Psychology of Justice, specifically, with victims, offenders and groups at risk. Also, it intends to provide students with knowledge and skills for the development of innovative research in this scientific domain. Also, we aim to help students in the development of their future professional identity, promoting their ethical reasoning and openness to implement practices of collaboration in the context of a multidisciplinary work.
