Presentation

Urban planning training at Lusófona University began in 1991 and, in the 1990s, research also began, as an essential factor for the development of the territory. The doctoral programme, created in 2008, has 4 curricular units covering 4 specific and essential areas for urbanism, natural environment, built environment, society and administration and general urbanism. It is from these that doctoral students are invited to reflect on different problems and deepen their critical sense. The assessment of these curricular units is carried out through 4 papers where the concepts and theories of each of the areas are developed, always in coordination with their research topic.

STUDY PLAN

1st Year / Comon Core

Anual	ects
Applied Urbanistics and Urban Design	14
Built Environment, Equipment and Transports	12
Natural Environment and Urban Landscape	12
Research Methods in Urban Planning	8
Society and Territory Administration and Governance	14

2nd Year / Comon Core

Anual	ects
Research Seminar in Urban Planning	15
Thesis I	45

3rd Year / Comon Core

Anual	ects
Thesis II	60
