Presentation

The Master in Communication, Networks and Technologies is an innovative course in the context of digital culture, online communication and virtual platforms. It offers advanced training in different areas of specialization, such as the networked arts, digital culture, audiovisual and multimedia communication for the web, the design and production of online projects, online entrepreneurship or cyberjournalism. The competition can be concluded with a dissertation, project work or internship. Commitment to the development of theoretical and practical skills in an area of studies that enhances the experience acquired in the Degrees in the areas of communication or audiovisual, enabling the pursuit of the aspirations of students both in the professional area and in the area of academic research leading to the doctoral cycle .
