Presentation

Master's Degree in Accounting, Taxation and Finance Qualification upon completion of 90 ECTS towards a Master's degree The process of accounting harmonization, in line with the increasing globalization of markets, along with the growing importance of tax planning, requires qualified and skilled professionals to meet the constant demands in these areas of business life. This course aims to provide integrated theoretical and technical training in the areas of accounting, finance, and taxation. It is relevant for those seeking access to the Certified Accountant profession, as well as for those interested in becoming a Certified Public Auditor. Taxation and finance are important components of the course, which enhance skills that meet current market needs and provide numerous opportunities to address research questions. The course is completed in 4 semesters, with 2 semesters dedicated to the curricular phase and 2 semesters dedicated to the dissertation/project work phase. There is continuous interaction between the two phases.
