Presentation

The Master in Design aims to maximize the efficiency of the design in society, considering fundamental a deep knowledge of the surrounding environment, reflecting and designing a society less domesticated to pre-existing models. It is supported by a multidisciplinary teaching staff with in academic and business experience, both national and international. Distinguished by its orientation towards a new society design in which: the actual action models are not presented as the only paradigm with a future; design can play a more relevant role in its development, not being reduced to technical and technological aspects; the project should extend to knowledge and skills in the field of economics, management, engineering, psychology, sociology, neurophysiology, art, ..., considering them essential in the creation and innovation processes.

STUDY PLAN

1st Year / Comon Core
