Duration

0 Years

Credits

9 ects

Presentation

The course provides knowledge and skills to design, implement and maintain management systems based on well-proven models that provide guidelines for enhancing an organization's ability to achieve sustained success. In addition, it comprises all the state-of-the-art approaches to promote the continuous improvement of business processes, including Lean, Six Sigma, and Theory of Constraints. Finally, the social, economic, and environmental pillars that drive business sustainability are also focused on this course.
