Presentation

The Postgraduate and Specialization Course in Innovation and Leadership in Municipal Civil Protection aims to train mayors and parish councils to play a key role in preparing for, responding to and managing crises at municipal level. This course combines theoretical and practical content, covering the principles of civil protection, the use of innovative technologies, crisis leadership and community mobilization. With a focus on the direct application of the skills acquired, the training prepares mayors to face the complex challenges of local risk management, building community resilience and implementing innovative civil protection strategies.

STUDY PLAN

1st Year / Common Core
