### Apresentação

At ReSound, sound is more than what we hear; it's how we connect, create, and innovate. The programme delves into sound's multifaceted presence in our lives: from the stage to performance art, from film to virtual reality, and from natural landscapes to urban soundscapes. It challenges students to rethink their engagement with the world, shaping artists and researchers who drive forward the evolution of sound across dynamic fields.

# PLANO DE ESTUDOS

## 1º Ano / Tronco comum

| 1º Semestre                 | ects | 2º Semestre                                         | ects |
|-----------------------------|------|-----------------------------------------------------|------|
| Acoustics & Psychoacoustics | 6    | Film Audio: Post-production tools                   | 6    |
| Audio and Music Production  | 6    | Film Sound Theory: History, Aesthetics & Subversion | 6    |
| Interactive Systems         | 6    | Interdisciplinary Project Incubation                | 6    |
| Sound Psychology            | 6    | Sound Ecosystems                                    | 6    |
| Synthesis and Sampling      | 6    | Sound/Music Interface                               | 6    |

## 2º Ano / Tronco comum

| 1º Semestre                                  | ects | 2º Semestre | ects |
|----------------------------------------------|------|-------------|------|
| Film Sound: Integrative methods and practice | 6    | Thesis      | 30   |
| Sound and the Environment                    | 6    |             |      |
| Sound Concepts                               | 6    |             |      |
| Sound Design and Immersion                   | 6    |             |      |
| Thesis Preparation                           | 6    |             |      |
