Presentation

Lusófona University, Porto University Centre, through the Civil Protection and Risk Analysis Group (RAGroup Portugal), is offering a postgraduate course in Military Security and Civil Protection, which addresses the risks and opportunities of the Digital Age as a key tool to support the management of crisis response, emergencies and war, aiming to equip professionals and students with skills in the integrated management of security, defence and civil protection, within a global context marked by hybrid threats, technological risks and cyber challenges. This is an academic course with a theoretical and practical component, focused on the study, analysis and application of the principles of security, national defence, civil protection and civil emergency planning.
