# ONCOLOGICAL AND RECONSTRUCTIVE SURGERY IN COMPANION ANIMALS

## Direction

Laurentina Pedroso | João Martins |  
Daiana Cardoso  
laurentina.pedroso@ulusofona.pt

## Secretariat

Secretariado Medicina Veterinária  
sec.medvet@ulusofona.pt

## Duration

48h

## Credits

6 ects

## Presentation

To present the principles of oncological surgery in companion animals so that students are able to apply them when indicated in clinical practice. To present the most up-to-date concepts for each type of oncological surgery and the general equipment required to perform this type of surgical procedure. To present the concept of local ablative procedures and their different techniques, as well as their combination with other techniques, so that students are able to select the most appropriate technique for different cases. By the end of the course, students should be able to confidently and effectively select the appropriate technique for each condition and apply it in clinical practice, always in accordance with the principles of oncological surgery.
