Apresentação

The Advanced VAT and Litigation Graduate Program is a high-level specialization program designed to address the growing complexity of the European and national tax ecosystems. With a highly practical and constantly updated approach, this course equips lawyers, economists, managers, certified accountants, and certified public accountants with the skills needed to lead the resolution of complex technical and legal problems. At a time of profound legislative change, the program focuses on the forefront of digital and regulatory transformations, analyzing in detail e-commerce, the new SME regime, and the disruptive impact of the ViDA (VAT in the Digital Age) package.
