## Presentation

As part of the celebrations marking the 40th anniversary of the Framework Law on the Education System, the seminar "40 Years of the Framework Law on the Education System: Between Legacy and Possible Futures" offers a forum for reflection and debate on the progress made and the challenges currently facing education in Portugal. Organized by CeIED- the Center for Interdisciplinary Studies in Education and Development- it is part of a national series of seminars, with the Porto session marking the conclusion of the initiative. This Short-Term Training Session (ACD), lasting 3 hours, is part of the seminar's program and serves as a forum for professional development and continuing education, combining insights from educational research with reflection on the current challenges facing the education system, schools, and their professionals.
