## **Introduction**

In recent years, Lusófona University, its Faculties and Schools have developed a wide range of activities both on and off campus, with the aim of raising awareness, alerting people and promoting concrete changes in environmental behavior.

Since 2022, the institution has made the 17 Sustainable Development Goals (SDGs) a strategic priority. In 2025, this commitment has significantly intensified, with the organization of multiple initiatives, such as events, webinars, lectures, seminars, technical visits, workshops, and research projects focused on the SDGs and sustainability values.

The main objective is to complement the academic knowledge of students, faculty, and staff, strengthening ties with the community and promoting good practices that contribute to reducing the institution's ecological footprint.

Lusófona University remains committed to informing and educating its entire academic community, including students, faculty, researchers, and staff, as well as the general public, on topics such as climate change, health, volunteering, and active citizenship. The aim is to reinforce individual and collective responsibility in protecting the planet, communities, and life.

---

### **Greener and More Sustainable Campus**

Transforming the campus into a greener and more sustainable space remains a priority. In 2025, the University reinforced its commitment to environmentally responsible practices, such as creating recycling points, installing a production unit for self-consumption, and promoting awareness-raising initiatives aimed at changing attitudes and behaviors.

The [Sustainability Journeys](#), held in May 2025, involved the entire academic community and featured a wide range of activities dedicated to climate action, the circular economy, urban biodiversity, and social justice. These conferences have established themselves as an annual space for reflection and commitment to sustainable development.

---

### **Eco-Schools and Lusófona Verde**

Since 2021, the Faculty of Engineering of Lusófona University, Lisbon University Center, has been part of the [Eco-Schools Program](#), coordinated by Professors Joana Lage and Elisabete

Maurício. In 2025, the University renewed its Eco-Schools Green Flag award for the fifth consecutive year, symbolizing its ongoing commitment to sustainability.

The Eco Schools Council, expanded in recent years, is now part of the Sustainability Advisory Board, which brings together representatives from all faculties, departments, and services, as well as students and faculty, including the International Relations Office, aligning with the objectives defined for this year.

Among the initiatives developed, projects in the areas of energy, water and waste management, air quality, biodiversity and the requalification of outdoor spaces stand out.

Since 2024, and continuing into 2025, the following departments are part of the Eco Schools and Sustainability Advisory Board:

- Marketing and Communications Department: Eugênia Vicente
  - Health and Wellness Service: Inês Santa
  - Legal Services: Graça Serrano and Elisabete Cipriano
  - Quality Management Department: Cristina Matos
  - Infrastructure Secretary: Filipe Marto
  - Employment and Internship Department: Verônica Almeida
  - Talent Management: Paula Cipriano
  - Eco-Schools Council: Students and teachers of the Faculty of Engineering
- 

## **Strategic Plan 2025-2030**

In 2025, the University approved its new [Strategic Plan 2025-2030](#), which places sustainability as a structuring axis of its mission, integrating it with the pillars of innovation, inclusion, and digitalization. This plan guides the University toward a more integrated, resilient approach, committed to the 2030 Agenda for Sustainable Development.

---

## **Sustainable Development Goals (SDGs)**

Lusófona University has strengthened its actions and commitments to several SDGs, including:

- **SDG 1 – No Poverty:**

On May 11, 2025, a [Solidarity Walk was organized](#) along the Marginal between Perafita and Leça, bringing together 290 participants. The event, which marked the 30th anniversary of the Porto Food Bank, had as its main objectives to collect food, recognize the work of partners, and strengthen the community spirit.

- **SDG 2 – No Hunger:**

Participation in the [UglyFruitsNOT! Project](#), which promotes conscious consumption and reduction of food waste, aligned with community actions for healthy and sustainable eating.

- **SDG 3 - Quality Health:**

Creation of a European Research Area focused on Human and Animal Health and Welfare. In partnership with health organizations, [Sports and Wellbeing Plans](#) for the entire educational community and families. In 2024, the [SPIC – Psychology, Innovation and Knowledge Service](#), which promotes psychological health, well-being and skills in the educational community and in the network of social and organizational partners.

- **SDG 4 - Quality Education:**

Promotion of "Education for All" through [Educational Benefits \(Scholarships and Social Action\)](#) for students , staff, teachers and families; Scholarships , Excellence , Merit and for students from CPLP countries – Community of Portuguese Speaking Countries; [Public and Private Protocols and Partnerships](#). Development of new undergraduate courses in emerging areas, professional master's degrees, distance learning, and certified modular training funded by the PRR and Portugal 2020. Promotion of the [Lusófona X Platform](#) and a diverse offering of curricular units.

- **SDG 5 - Gender Equality:**

Creation of the [Gender and Diversity Plan 2021/2027](#), which addresses topics such as work-life balance, diversity in leadership, equality in recruitment and progression, integration of the gender/diversity dimension in research, and measures against prejudice and harassment .

- **SDG 6 - Drinking Water and Sanitation:**

Installation of a water reservoir that uses rainwater for sanitary purposes.

- **SDG 7 - Renewable and Affordable Energy:**

Installation of a [Self-Consumption Production Unit \(UPAC\)](#) which ensures the production of almost all electricity through photovoltaic panels.

- **SDG 8 - Decent Work and Economic Growth :**

Talent attraction, funding and research management, budget optimization, and implementation of effective academic and administrative processes. Research and innovation are promoted through [ILIND – the Lusophone Institute for Research and Development](#). Highlights include leadership in projects approved by the FCT, a large number of Erasmus Mundus courses, and participation in innovative European projects such as [FILMEU](#). Creation of quality and talent management services, improvement of spaces and equipment, mentoring programs and support for academic success.

- **SDG 9 – Industry, Innovation and Infrastructure:**

In 2025, Lusófona University defined [guidelines for the responsible use of Generative Artificial Intelligence \(IAGen\)](#), promoting ethics, transparency and academic rigor in the adoption of emerging technologies.

- **SDG 10 - Reducing Inequalities:**

Promoting integration into professional life, [internships](#), volunteering, involving students, teachers and staff in partnership with external organizations. Strengthening the [Play – Creative and Technological Incubator](#), with greater support for start-ups and projects by former students.

- **SDG 11 - Sustainable Cities and Communities:**

The campus is part of Lisbon's electric and environmental mobility project, with a bicycle park and two fast-charging stations for electric vehicles.

- **SDG 12 – Responsible Consumption and Production:**

Implementation of projects and actions that [promote change in attitudes and behaviors](#), encouraging the use of digital platforms, [dematerialization of services](#) and [energy savings](#).

- **SDG 13 - Climatic Action:**

Creation of [recycling points](#), training in waste [management and separation](#), encouraging the use of reusable bottles and promoting the consumption of public water with [community involvement](#).

- **SDG 14 – Life Below Water**

Lusófona University participates in the [European Free LitterAT Project](#), coordinated by Interreg Atlantic, which investigates the presence of macro and microplastics in Atlantic coastal areas and develops mitigation strategies.

- **SDG 15 – Protecting Life on Land :**

In 2025, Lusófona University – Porto University Center organized the [International Blended Intensive Program](#) on rural fire prevention, promoting the sustainable use of technology in the protection of ecosystems.

- **SDG 16 - Peace, Justice and Effective Institutions :**

Implementation of a [Code of Ethics that guides the behavior and social well-being](#) of the academic community, [Internal Complaints Channel](#) to guarantee institutional integrity and a [Student Ombudsman to](#) resolve [educational and](#) administrative issues.

- **SDG 17 - Partnerships for the Implementation of the Goals:**

Promoting the link between teaching, innovation and research, with the transformation of organizational units into teaching, research and community service units, aligned with the European agenda focused on health, inclusive education, culture, innovation and [open science](#).

---

## **Strategic Objectives 2026**

For the next year, Lusófona University has defined the following main goals:

- Integration of professors from all faculties, schools and the International Relations Service.
- Creation of a common activity plan.
- Adjustment and inclusion of the SDGs in cultural activities, events, projects, lifelong learning courses and degree programs.

In 2025, Lusófona University reaffirms its role as a higher education institution committed to social and environmental transformation. The consolidation of sustainable practices, active community participation, and the integration of sustainability into the

educational plan demonstrate our commitment to a university that is increasingly green, supportive, and prepared for the challenges of the future.

## Campus Activities

Lusófona University has been consolidating its commitment to sustainability, inclusion, and innovation through various activities on its campus. These initiatives reflect an integrated approach that combines environmental awareness, active engagement of the academic community, and the promotion of diverse educational and cultural practices.

From environmental monitoring and waste recovery projects to sporting, cultural, and scientific events, campus activities promote participation, knowledge, and social responsibility, aligning with the Sustainable Development Goals. Thus, Lusófona University remains at the forefront of developing conscious, creative citizens committed to contemporary challenges.

## Participation in International Conferences and Activities

Lusófona University has been establishing itself on the international scene through consistent and active participation in conferences, collaborative projects, scientific networks, and high-impact academic activities. Between 2023 and 2025, the University was involved in several initiatives aligned with the Sustainable Development Goals (SDGs), demonstrating its commitment to innovation, sustainability, inclusion, and global cooperation.

These actions strengthen Lusófona University's position as an active player in the European and international sphere of higher education, science, and culture, contributing significantly to social and environmental progress through education, applied research, and civic participation.

## Cultural Activities

Lusófona University's cultural activities play a fundamental role in fostering creativity, engaging the academic community, and valuing artistic and cultural diversity. In 2025, several initiatives stood out, reinforcing the University's role as a space for cultural production, enjoyment, and reflection.

### Museums Go to ULusófona / ULusófona Goes to Museums

"Museums Go to ULusófona" / "ULusófona Goes to Museums" initiative promoted collaboration opportunities between Portuguese museums and Lusófona University. The session, specifically aimed at professors and students in the fields of Cinema, Animation, Video Games, Sound Sciences and Technologies, Communication Sciences, Fashion Design, Visual Arts Education, Communication in Organizations, and Media Arts, aimed to foster strategic partnerships.

During the event, museum institutions presented proposals focused on developing joint projects, creating content for permanent and temporary exhibitions, defining research themes, and identifying collaborative funding opportunities.

The session also marked the official launch of the [CICANT Crea-Heritage Lab](#), a new laboratory dedicated to the innovative promotion of Cultural Heritage.

---

### Over & Out 2025

**Over & Out** is an annual event of celebration, socializing, and sharing talents, which is renewed with each edition to provide unique experiences for students, faculty, and the academic community.

The 2025 edition, held between **July 7th and 10th**, included a wide range of activities spread across various spaces on campus, promoting the exhibition of academic and artistic work developed throughout the year.

---

The event highlighted the creativity and dedication of students and faculty, reaffirming the University's commitment to pedagogical excellence, the appreciation of artistic expression, and the strengthening of community spirit.

---

### Fernando Lopes Cinema

The **Fernando Lopes Cinema Room**, located on the Campo Grande Campus, is a dedicated film screening facility integrated into the **Department of Cinema and Media Arts (DCAM) activities**. Equipped with DCP digital projection technology and 7.1 sound, the room reinforces the educational component in the fields of cinema and multimedia arts.

A partnership with Leonardo Filmes allows for festivals, retrospectives, and themed sessions open to the public, fostering a dynamic connection between the University and society.

---

### FilmEU Film Club

The **FilmEU Film Club** is a joint initiative between Lusófona University, **IADT (Ireland)**, **LUCA School of Arts (Belgium)**, and **Tallinn University (Estonia)**. This regular program offers students international film screenings followed by informal discussions with guests and participants of various nationalities.

The sessions promote contact with cinematographies from different cultures, encouraging sharing between partner institutions of the **FilmEU network**.

---

### Great Artists on Campus 3

The third edition of the **Great Artists on Campus cycle**, organized by **DCAM**, brought to the University some of the most relevant names in contemporary art, both national and international.

---

The monthly conferences provided opportunities for direct contact between the academic community and artists, curators, and thinkers in the fields of visual arts, cinema, music, and urban culture, reinforcing the connection between artistic practice and critical thinking.

## **Health and Wellness Activities**

At a time when promoting mental, physical, and relational health has become a priority across society, Lusófona University reinforces its commitment to the well-being of its academic community. Through the regular organization of various activities and initiatives aimed at students, faculty, researchers, staff, and the general public, moments of balance, sharing, and personal development have been promoted, with a focus on prevention and holistic health.

Through [SPIC – Psychology, Innovation and Knowledge Service](#), the University offers specialized psychological care, reinforcing its commitment to comprehensive well-being.

These initiatives are aligned with the UN Sustainable Development Goals, in particular SDG 3 – Good Health.

## Courses

### Bachelor's degrees

#### [\*\*Bioeconomy and Circular Technology\*\*](#)

This pioneering degree program in Portugal prepares professionals with interdisciplinary training in biotechnology, the environment, and economics. It promotes the implementation of a sustainable and circular bioeconomy, aligned with European priorities. The program includes an ERASMUS+ partnership with the Hochschule Trier (Germany), promoting international mobility and the exchange of best sustainable practices.

---

### Master's degrees

#### [\*\*Artificial Intelligence for Sustainable Societies \(Erasmus Mundus\)\*\*](#)

A joint international program that integrates sustainability, artificial intelligence, and citizen participation. Students acquire skills in data science, participatory design, and ethical analysis of digital technologies. The course promotes data-driven decisions and sustainable solutions with positive social impact, from a multidisciplinary and intercultural perspective.

#### [\*\*Smart and Sustainable Energy Systems\*\*](#)

This master's degree focuses on training professionals capable of meeting the challenges of the energy transition. It covers areas such as renewable energy, decarbonization, digitalization, energy markets, and artificial intelligence. With a strong interdisciplinary component, the program combines technological innovation and sustainability, preparing specialists to lead the transformation of the energy sector.

## **Postgraduate Studies**

### **Sustainable Management in Health**

This postgraduate program combines technical knowledge with an ethical and sustainable vision of healthcare management. It addresses topics such as quality, efficiency, patient well-being, and the sustainability of healthcare systems. It is designed for healthcare managers and professionals and is offered in an after-work format.

### **Sustainability in Waste Management – Specialization in Biowaste**

This specialized course addresses the challenges posed by PERSU 2030 and the transition to more sustainable waste management systems. It trains technicians and managers in the valorization and optimization of biowaste collection and treatment, with an applied approach focused on real-world solutions.

---

## **Free Training**

### **Sustainable Management of Audiovisual Production – Green Consultants**

This training is aimed at professionals in the audiovisual sector who wish to apply sustainable practices in the pre-production, filming, and post-production phases. Inspired by the model of the University of Medien Stuttgart, it prepares consultants to lead the green transformation in the creative industries, promoting carbon neutrality and energy efficiency in film productions.

## Training Actions and Workshops

Between 2023 and 2025, Lusófona University hosted a wide range of training activities, lectures, conferences, and workshops for the academic community and society at large. ## **Production , namely Book Publishing**

### **PURE - Central Scientific Management Platform of Lusófona University**

Lusófona University has implemented PURE, a Current Research Information System (CRIS), which stands out for its ability to organize and promote the scientific production of its researchers and research teams. PURE is an innovative tool that allows the creation and management of curricula, covering scientific publications, projects, and activities at various levels—from the individual to the university as a whole.

#### **What is PURE?**

[PURE](#) is a platform that centralizes all information related to Lusófona University's scientific output. Researchers can independently create and update their profiles, providing an integrated view of their contributions and interactions with other content. Furthermore, the system organizes information hierarchically, offering reports and management tools at both the individual and institutional levels.

#### **Features and Benefits**

PURE offers researchers a number of advantages, such as the ability to integrate their publications into the open access system. This facilitates the automatic submission of articles to RUN (National University Repository) and OpenAIRE, promoting visibility and compliance with open access requirements for scientific publications.

Furthermore, PURE is fully compatible with ORCID, allowing data to be exported between the two platforms and facilitating the management of researchers' CVs. Integration with Ciência Vitae, the national CV management system, further enhances this interconnection by automating profile updates and data sharing between the platforms.

## **Coordination and Participation in National and International Research and Development Projects**

### **ILIND - Lusophone Institute for Research and Development**

Scientific research is one of the fundamental pillars of the activities carried out by COFAC's educational institutions. To coordinate research with teaching, **ILIND—the Lusophone Institute for Research and Development** —was created as a research-focused unit.

#### **Main Objectives:**

- Promote Research and Development (R&D) initiatives and disseminate knowledge in various scientific areas;
- Coordinate and systematize the activities of the R&D units of the aforementioned educational institutions, ensuring the process of preparation, submission and management of projects, as well as support to individual researchers;
- Coordinate R&D and advanced training processes, particularly in terms of doctoral programs, based on common scientific areas;
- Promote scientific exchange with institutions and researchers, both national and international;
- Ensure adequate logistical and financial resources for the execution of R&D activities;
- Promote the submission of interdisciplinary projects involving different research units;
- Create scientific, cultural and community service extension networks.
